# HIGH GRADE TOMATO SEED

---

## *IS OUR GREAT SPECIALTY*

 All our Specialty Tomato Seed is grown, selected and saved exclusively from the best specimens for seed, and from what is usually known as crown and second settings, and is of the highest quality. Moreover, no seed is grown twice in succession on the same ground and blight of any kind is unknown among any of our tomato seed crops.

 **Market Gardeners, Large Growers, Shippers and Cannors** will find our **Selected Tomato Seed** reliable in every respect.

 **We have produced**, at great expense and personal labor, superb varieties well calculated to meet all the requirements of soil, climate, locality, market, as well as the many exacting demands of the most critical consumer.

 **Healthy, Blight-Proof Seed Stock.** We also exercise the greatest care in growing all our seed, that it not only be pure and true to name, but also that it be saved from strong, healthy and vigorous plants, free from all traces of disease of any kind. Our customers may thus rest assured that the seed they get from us will be absolutely free from any trace of disease whatsoever.

 The growing of high grade Tomato Seed has long been a leading and important specialty with us and we probably distribute more seed to **critical market garden** and **select canning establishments** than any other three seedsmen in the United States.

**Remember, the Main Thing in Making a Good Crop of Tomatoes is to Get Your Seed from Us. Buy the Best**
